Integrated Costschedule Risk Analysis

Several issues must be addressed in

developing an integrated cost / schedule risk analysis on a real schedule: The schedule is usually developed to a lower level of detail than the cost estimate. In our schedule, while the schedule includes tasks of Design 1, Build 1 and Test 1, the cost estimate may be developed and actual costs collected at the Component 1 summary level.

Integrated cost and schedule project risk analysis

Integrated cost-schedule risk analysis helps us determine how likely the project will go over budget with the current plan, how much contingency reserve is required to achieve a desired level of certainty, and which risks are most important so the project manager can mitigate them and achieve a better result.

Integrated Cost-Schedule Risk Analysis: Amazon.co.uk ...

Integrating cost and schedule risk into one analysis based on the project schedule loaded with costed resources from the cost estimate provides both: (1) more accurate cost estimates than if the schedule risk were ignored or incorporated only partially, and (2) illustrates the importance of schedule risk to cost risk when the durations of activities using labor-type (time-dependent) resources are risky.

For an integrated cost-schedule risk analysis (and for schedule risk analysis) a summary schedule that is integrated, includes representation of all the work, has activities properly linked with logic and includes enough detail to highlight the main project milestones may be used.

Integrated Cost-Schedule Risk Analysis | Risk | Monte ...

A major flaw in traditional methods of cost risk analysis is that it does not adequately account for variances in time dependent costs. Time dependent costs are associated with resources with unit rates (hourly/daily) that can expand or contract if more or less time is required to complete project activities and can be a major source of cost risk in many projects.

Integrated Cost and Schedule Risk Analysis Software

The integrated cost and schedule risk is defined as the probability of failing to complete the project under a specified objective with respect to cost and schedule.
