It is argued that the conception of social science emerging today is one that involves a synthesis of radical constructivism and critical realism. The crucial challenge facing social science is a question of its public role: growing reflexivity in society has implications for the social production of knowledge and is bringing into question the separation of expert systems from other forms of knowledge.

Social constructivism and participative learning beyond bricks and mortar. As the world grapples with the short-to-longer-term imperative to identify distance- and remote-learning alternatives to previously face-to-face instruction, I am struck that some of the key themes that have emerged from my ongoing doctoral research in rural communities in Greece might also be relevant to responding to the growing Covid-19 crisis.
