The Singular Universe And Reality

The Singular Universe and the Reality of Time: A Proposal in Natural Philosophy is a book about cosmology, philosophy of time, metaphysics and scientific naturalism by the American theoretical physicist Lee Smolin and the Brazilian philosopher Roberto Mangabeira Unger. The authors argue that the current crisis in cosmology is a result of physicists making the wrong commitments to universalizing local experiments and to a block universe. They suggest instead that new research projects would be re

The Singular Universe and the Reality of Time by Roberto ...

1) There is only one universe at a time. Our universe is not one of many worlds. It has no copy or complete model, even in mathematics. The current interest in multiverse cosmologies is based on fallacious reasoning. 2) Time is real, and indeed the only aspect of our description of nature which is not emergent or approximate.

The Singular Universe... - Lee Smolin

The authors (one a philosopher and one a cosmologist) agree and propose a new research paradigm for cosmology based on three principles: there is only a single causally related universe,; time is real and travels in only one direction (it is not emergent from space time and is not just a mathematical abstraction; and mathematics is a tool and not inherently

predictive of reality.

RMU & LS want to encourage scientists to investigate the cosmos guided by their three ideas (singular universe, reality of time, regional applicability of mathematics). The first problem is that each one of those ideas is philosophically complex, and contrary to the prevailing views of many physicists, cosmologists and theorists.

The Singular Universe and the Reality of Time: A Proposal ...

Unger and Smolin provide readers with an uneven and, at times, scientifically unsupported approach to their views on the reality of time (time is real, inclusive, non-emergent, and unidirectional) and the existence of a singular universe (the universe is with all likelihood a single universe...forget the multiverse).

The Singular Universe and the Reality of Time by Roberto Mangabeira Unger and Lee Smolin, CUP, 2015 brings to our attention a likely explanation for the lack of progress in cosmology since the 1970s. The book will be of interest to some lawyers (Unger is, among other things, a legal theorist) for the light it may shed by analogy on some aspects of legal theory.
