CHAPTER TELESCOPING THE TIMES An Era of Social Change 23

In cognitive psychology, the telescoping effect refers to the temporal displacement of an event whereby people perceive recent events as being more remote than they are and distant events as being more recent than they are. The former is known as backward telescoping or time expansion, and the latter as is known as forward telescoping. Three years is approximately the time frame in which events switch from being displaced backward in time to forward in time, with events occurring three years in
