An odd duality, or even contradiction, has marked the social science literature. One portrait gleaned from scholarly works has set politics – especially the state – at center stage, kneading society

into new forms and shapes, adapting it to the exigencies created by industrialization or other stimuli. This is the image of the strong state.

The state's struggle for social control is characterised by conflict between state leaders, who seek to mobilise people and resources and impose a single set of rules, and other social organisations applying different rules in parts of the society. The distribution of social control in society that emerges as a result of this conflict (between societies and states) is the main determinant of whether states become strong or weak.
