01. Vernier Caliper. Vernier Caliper is a widely used linear measurement instrument with a least count of 0.02 mm. It is used to measure linear dimensions like length, diameter, depth. It is Basic Instrument of measurement, consist of two types of scale. The main scale and the Vernier scale that can slide along the main scale.

Top-10 Mechanical Measuring Instruments - GaugeHow

Recall that a sample should be an accurate representation of a population, because the total population may not be available. An instrument that is externally valid helps obtain population generalizability, or the degree to which a sample represents the population. Content validity refers to the appropriateness of the content of an instrument. In other words, do the measures (questions, observation logs, etc.) accurately assess what you want to know?
