Green Techniques for Organic Synthesis and Medicinal ...

Green Techniques FOR Organic Synthesis AND Medicinal Chemistry. An updated overview of the rapidly developing field of green techniques for organic synthesis and medicinal chemistry. Green chemistry remains a high priority in modern organic synthesis and pharmaceutical R&D, with important environmental and economic implications.

Green Techniques for Organic

Synthesis and Medicinal ...

Green Synthetic Techniques: Presents a series of new techniques, assessing the green chemistry aspects and limitations (i.e. cost, equipment, expertise). Techniques include reactions in alternative solvents, atom economic multicomponent reactions, microwave and ultrasonic reactions, solid-supported synthesis, fluororous and ionic liquid-based recycling techniques, and flow reactors.

Green Techniques for Organic Synthesis and Medicinal ...

Green chemistry is a new way of looking at organic synthesis and the design of drug molecules, offering

important environmental and economic advantages over traditional synthetic processes. Pharmaceutical companies are increasingly turning to the principles of green chemistry in an effort to reduce waste, reduce costs and develop environmentally benign processes.
