Play the Game Players take turns to show their 3 cards and add the value of the cards. If the total is 15, the player can keep their cards. If it is not 15 the cards are returned to the dealer and shuffled into the deck for the next round. Play continues for a set time. The winner is the player with the most cards when play finishes.

Math Card Games - Mathematics Shed

A lottery wheel is not enough, you need an advanced lottery calculator that can separate the best type of combinations from the worst ones. With a calculator, you don't need a superb mathematical skill to know the combinations that will give you the best advantage of winning. However, calculators are not created equally, and using the wrong one will only lead you to more failures than successes.
