The Reality of ESP

A Physicist's Proof of Psychic Abilities Quest Books

On February 4, 1974, members of the Symbionese Liberation Army kidnapped nineteen-year-old newspaper heiress Patricia Hearst from her Berkeley, California apartment. Desperate to find her, the police called physicist Russell Targ and Pat Price, a psychic retired police commissioner. As Price turned the pages of the police mug book filled with hundreds of photos, suddenly he pointed to one of them and announced, “That’s the ringleader.” The man was Donald DeFreeze, who was indeed subsequently so identified. Price also described the type and location of the kidnap car, enabling the police to find it within minutes. That remarkable event is one reason Targ believes in ESP. Another occurred when his group made \$120,000 by forecasting for nine weeks in a row the changes in the silver-commodity futures market As a scientist, Targ demands proof. His experience is based on two decades of investigations at the Stanford Research Institute (SRI), which he cofounded with physicist Harold Puthoff in 1972. This twenty-million dollar program launched during the Cold War was supported by the CIA, NASA, the Defense Intelligence Agency, and Army and Air Force Intelligence. The experiments they conducted routinely presented results could have happened by chance less than once in a million. Targ describes four types of experiments: Remote Viewing, in which a person describes places and events independent of space and time. For example, while in California Price drew to scale a Soviet weapons factory at Semipalitinsk with great accuracy later confirmed by Satellite photography. In another remote viewing, Targ accurately sketched an airport in San Andreas, Columbia himself. Distant Mental Influence, where the thoughts of the experimenter can positively or negatively affect the physiology (heart rate, skin resistance, etc.) of a distant person. Whole field isolation, where someone in a state of sensory isolation accurately describes the visual experiences of someone else in another place Precognition and retrocausality, showing that the future can affect the past. That is, the elephant you see on television in the morning can be the cause of your having dreamed about elephants the previous night. Final chapters present evidence for survival after death; explain how ESP works based on the Buddhist/Hindu view of our selves as nonlocal, eternal awareness; discuss the ethics of exercising psychic abilities,and show us how to explore ESP ourselves. “I am convinced,” Targ says, “that most people can learn to move from their ordinary mind to one not obstructed by conventional barriers of space and time. Who would not want to try that?”

ESP Bellwether Media

There are many different kinds of extra-sensory perception. Some people claim they can see future events. Other people claim they can see far-off events in their mind. Students will judge for themselves in this introduction that provides information on the evidence and skepticism about ESP.

How to Test and Develop Your ESP Madison Books

Psychic abilities such as telepathic communication, clairvoyance, and premonitions have intrigued believers and the curious for ages. Developing ESP Createspace Independent Publishing Platform

Extrasensory Perception or ESP is something you can develop that will give you an intuition like no other. The problem for most people is they don't know how to develop their own intuition. There are some people in the world who know how to do telepathy and literally move matter with their mind alone. This has been document and witnessed. There are other people who can just 'know' what someone else is thinking; like having x-ray vision into someone else's thoughts. Wouldn't that be something? To be able to read the thoughts of another human being? It would be very useful in many notable contexts. You'd know what your boss was thinking? You'd be able to guess what others felt about you? But really you would know-there wouldn't be any guessing! This book is going to help you develop your own ESP, so you can achieve knowing what other people think, without them having to come out and tell you. I remember back during my college years, a communications teacher lecturing on how the greatest ability one has, concerning verbal communication, is not verbalizing what shouldn't be verbalized. She was referring to the pricelessness of remaining silent when one doesn't have anything useful or meaningful to say. After you get through with this book, you'll be able to tap into what other people are thinking about. You'll be able to harness the power of your own Extrasensory Perception to intuit psychically what other people are thinking. This is a very valuable skillset, because once you are able to know what other people are thinking, you can predict their actions, making activities, like selling, easy to do. You can likewise predict with almost certain accuracy when other people mean you harm but appear innocent enough. You would be able to read people's thoughts, getting inside their heads, so you could persuade and communicate ideas that resonated with them. It would be like having your own private entrance into the world of someone else. Listen, we have a lot to cover. This book will get you there, but I need your full attention. Are you ready to learn? I hope so. Let's learn how to Develop ESP. Grab Your Copy Now!

Phenomena

The Secret History of the U.S. Government's Investigations into Extrasensory Perception and Psychokinesis *Little, Brown*

The definitive history of the military's decades-long investigation into mental powers and phenomena, from the author of Pulitzer Prize finalist The Pentagon's Brain and international bestseller Area 51. This is a book about a team of scientists and psychics with top secret clearances. For more than forty years, the U.S. government has researched extrasensory perception, using it in attempts to locate hostages, fugitives, secret bases, and downed fighter jets, to divine other nations' secrets, and even to predict future threats to national security. The intelligence agencies and military services involved include CIA, DIA, NSA, DEA, the Navy, Air Force, and Army-and even the Joint Chiefs of Staff. Now, for the first time, New York Times bestselling author Annie Jacobsen tells the story of these radical, controversial programs, using never before seen declassified documents as well as exclusive interviews with, and unprecedented access to, more than fifty of the individuals involved. Speaking on the record, many for the first time, are former CIA and Defense Department scientists, analysts, and program managers, as well as the government psychics themselves. Who did the U.S. government hire for these top secret programs, and how do they explain their military and intelligence work? How do scientists approach such enigmatic subject matter? What interested the government in these supposed powers and does the research continue? Phenomena is a riveting investigation into how far governments will go in the name of national security.

Equally Shared Parenting

Rewriting the Rules for a New Generation of Parents *Penguin*

This Is Parenting on Your Own Terms Chances are, you'd rather not forfeit your happy, rested life the moment you become a parent. As a mom, you may want to keep your career, but aren't sure how to balance it with housework and childcare. As a dad, you probably want to witness your child's milestones, but a demanding job may get in the way. And what about time for yourself (never mind your sex life)? Marc and Amy Vachon were determined to beat this scenario when their first child was born. They vowed to sidestep the world's expectations of new parents and create a parenthood model that worked for them. Their strategy was to share everything-the good and the bad. They became peers in each area of parenthood: childcare, housework, and breadwinning. They also made time for themselves, and for each other. They shared the burdens so nobody was overwhelmed, and the joys so neither missed out on the fun. Drawing on Marc and Amy's experiences, as well as those of dozens of ESP couples, Equally Shared Parenting shows you how to create a balanced life that is rarely experienced by today's parents. It's not just about who vacuums and who does the dishes, or who brings in the paycheck and who tends to the kids. You'll learn how to look at every aspect of parenthood, money, careers, and your individual needs, so you can build a life that works for you both.

Know Your Own Mind

An Amazing Revelation of Your Inner Consciousness

In this book, first published in 1953, Harold Sherman makes clear how we can attune our minds to the God Consciousness within through proper exercise of meditation, faith, prayer and intuition. By learning how to develop these faculties, we can help to rid ourselves of the loneliness and insecurity we feel. This makes us strong within, and with this new strength we can at last begin to know the joy of living a full life! * The book contains many highly interesting case histories of men and women who have had unusual, supernormal experiences. For those who are skeptical of the extrasensory powers of the mind, Harold Sherman gives many fascinating illustrations of his own adventures in the realm of mind. * He also reveals how to relax body and mind, how to picture in consciousness what is desired, how to cause the creative power within to bring this picture to pass in real life through right use of the power of prayer supported by faith. Five basic prayers are presented, designed to reach the God Consciousness and to place the individual in such attunement that he can attract anything to him. * The reader of this book will also find a technique of healing so clearly set forth that he will immediately begin using its methods in his own life. * From Norman Vincent Peale, author of The Power of Positive Thinking: "I have just read your book, Know Your Own Mind. It is in the best tradition of the Harold Sherman books, and I find it enlightening, interesting, and helpful. You have a sound philosophy and understand of life and people." * From Ernest Holmes, founder of Science of Mind: "Know Your Own Mind is really a wonderful book. It very understandingly presents the high workings of the mind and the functioning of the intuition. I particularly like your idea that God speaks to man through the intuition. I can wholeheartedly well recommend Know Your Own Mind to all who are in search of self-development through coming better to understand its mental and spiritual truths. No one could study your book without deriving great benefit and self-advancement." -ERNEST HOLMES, founder of Science of Mind

Experiments in Plant Hybridisation *Cosimo, Inc.*

Experiments which in previous years were made with ornamental plants have already afforded evidence that the hybrids, as a rule, are not exactly intermediate between the parental species. With some of the more striking characters, those, for instance, which relate to the form and size of the leaves, the pubescence of the several parts, etc., the intermediate, indeed, is nearly always to be seen; in other cases, however, one of the two parental characters is so preponderant that it is difficult, or quite impossible, to detect the other in the hybrid. from 4. The Forms of the Hybrid One of the most influential and important scientific works ever written, the 1865 paper Experiments in Plant Hybridisation was all but ignored in its day, and its author, Austrian priest and scientist GREGOR JOHANN MENDEL (18221884), died before seeing the dramatic long-term impact of his work, which was rediscovered at the turn of the 20th century and is now considered foundational to modern genetics. A simple, eloquent description of his 18561863 study of the inheritance of traits in pea plantsMendel analyzed 29,000 of themthis is essential reading for biology students and readers of science history. Cosimo presents this compact edition from the 1909 translation by British geneticist WILLIAM BATESON (18611926).

Introducing English for Specific Purposes *Routledge*

Introducing English for Specific Purposes presents the key concepts and practices of ESP in a modern, balanced, and comprehensive way. This book defines ESP and shows how the approach plays a crucial role in the world of English language teaching. Explaining how needs analysis, language and learning objectives, materials and methods, and evaluation combine to form the four main pillars of ESP, the book includes: practical examples that illustrate how the core theories and practices of ESP can be applied in real-world academic and occupational settings; discussion of some of the most hotly debated issues in ESP; insights on how ESP courses can be organized and integrated to form a complete program; reflection boxes, practical tasks, extension research questions, and resources for further reading in each chapter. Introducing English for Specific Purposes serves as an ideal textbook for graduate and advanced undergraduate students studying courses on English for Specific Purposes or English for Academic Purposes, as part of degrees in English for Specific Purposes, Education, ELT, Applied Linguistics, TESOL or TEFL. This comprehensive publication is also an invaluable reference resource for pre-service and in-service teachers of ESP, and for English program managers and administrators.

The Demon-Haunted World

Science as a Candle in the Dark *Ballantine Books*

A prescient warning of a future we now inhabit, where fake news stories and Internet conspiracy theories play to a disaffected American populace “A glorious book . . . A spirited defense of science . . . From the first page to the last, this book is a manifesto for clear thought.”—Los Angeles Times How can we make intelligent decisions about our increasingly technology-driven lives if we don’t understand the difference between the myths of pseudoscience and the testable hypotheses of science? Pulitzer Prize-winning author and distinguished astronomer Carl Sagan argues that scientific thinking is critical not only to the pursuit of truth but to the very well-being of our democratic institutions. Casting a wide net through history and culture, Sagan examines and authoritatively debunks such celebrated fallacies of the past as witchcraft, faith healing, demons, and UFOs. And yet, disturbingly, in today's so-called information age, pseudoscience is burgeoning with stories of alien abduction, channeling past lives, and communal hallucinations commanding

growing attention and respect. As Sagan demonstrates with lucid eloquence, the siren song of unreason is not just a cultural wrong turn but a dangerous plunge into darkness that threatens our most basic freedoms. Praise for The Demon-Haunted World “Powerful . . . A stirring defense of informed rationality. . . Rich in surprising information and beautiful writing.”—The Washington Post Book World “Compelling.”—USA Today “A clear vision of what good science means and why it makes a difference. . . . A testimonial to the power of science and a warning of the dangers of unrestrained credulity.”—The Sciences “Passionate.”—San Francisco Examiner-Chronicle

Thoughts Through Space

A Remarkable Adventure in the Realm of Mind *Hampton Roads Publishing Company Incorporated*

Thoughts Through Spacehad its origin in a daring plan conceived by two courageous men. It began in Autumn 1937 when a group of Russian flyers on a trans-polar flight crashed on a shelf of ice on the Alaskan side of the Pole. To find and rescue them--if they were still alive--the Russian government commissioned Arctic explorer Sir Hubert Wilkins to organize and lead an aerial search in those desolate regions. While in New York, prior to his departure, Sir Hubert met Harold Sherman, a student of mental powers who had long been intrigued by telepathy, the phenomenon of mind-to-mind communication. Seeing an unusual opportunity to put telepathy to a scientific test, Sherman and Wilkins decided to collaborate on a six-month experiment. It was agreed between them that Wilkins, once his expedition was underway, would try to transmit thought messages at prearranged times directly to Sherman in New York. Both men would keep written records of each session, Wilkins noting down his thoughts as "sender," and Sherman recording his mental impressions in his role as "receiver." This account re-creates all the absorbing drama and adventure of the experiment as the participants lived it. With Wilkins you fly in a small plane over the roof of the world, scanning the moonlit landscape for lost fliers, your mind filled with worried thoughts of weather conditions, radio contacts, fuel supplies, and countless other perils while straining to send your thoughts across space to the waiting mind of Harold Sherman. With Sherman, you will sit in a darkened room in New York with sights and sounds flooding into your awareness. And you will read of the remarkable successful results when the two men finally compared notes, proving that the thought--messages were indeed sent and received across 3,400 miles. Sherman's years of study convinced him that his telepathy is a common human ability, and that we can all learn to use it.

Credit Where It's Due

Rethinking Financial Citizenship *Russell Sage Foundation*

An estimated 45 million adults in the U.S. lack a credit score at time when credit invisibility can reduce one’s ability to rent a home, find employment, or secure a mortgage or loan. As a result, individuals without credit—who are disproportionately African American and Latino—often lead separate and unequal financial lives. Yet, as sociologists and public policy experts Frederick Wherry, Kristin Seefeldt, and Anthony Alvarez argue, many people who are not recognized within the financial system engage in behaviors that indicate their credit worthiness. How might institutions acknowledge these practices and help these people emerge from the financial shadows? In Credit Where It’s Due, the authors evaluate an innovative model of credit-building and advocate for a new understanding of financial citizenship, or participation in a financial system that fosters social belonging, dignity, and respect. Wherry, Seefeldt, and Alvarez tell the story of the Mission Asset Fund, a San Francisco-based organization that assists mostly low- and moderate-income people of color with building credit. The Mission Asset Fund facilitates zero-interest lending circles, which have been practiced by generations of immigrants, but have gone largely unrecognized by mainstream financial institutions. Participants decide how the circles are run and how they will use their loans, and the organization reports their clients’ lending activity to credit bureaus. As the authors show, this system not only helps clients build credit, but also allows them to manage debt with dignity, have some say in the creation of financial products, and reaffirm their sense of social membership. The authors delve into the history of racial wealth inequality in the U.S. to show that for many black and Latino households, credit invisibility is not simply a matter of individual choices or inadequate financial education. Rather, financial marginalization is the result of historical policies that enabled predatory lending, discriminatory banking and housing practices, and the rollback of regulatory protections for first-time homeowners. To rectify these inequalities, the authors propose common sense regulations to protect consumers from abuse alongside new initiatives that provide seed capital for every child, create affordable short-term loans, and ensure that financial institutions treat low- and moderate-income clients with equal respect. By situating the successes of the Mission Asset Fund in the larger history of credit and debt, Credit Where It’s Due shows how to prioritize financial citizenship for all.

Algorithms of Oppression

How Search Engines Reinforce Racism *NYU Press*

A revealing look at how negative biases against women of color are embedded in search engine results and algorithms Run a Google search for “black girls”—what will you find? “Big Booty” and other sexually explicit terms are likely to come up as top search terms. But, if you type in “white girls,” the results are radically different. The suggested porn sites and un-moderated discussions about “why black women are so sassy” or “why black women are so angry” presents a disturbing portrait of black womanhood in modern society. In Algorithms of Oppression, Safiya Umoja Noble challenges the idea that search engines like Google offer an equal playing field for all forms of ideas, identities, and activities. Data discrimination is a real social problem; Noble argues that the combination of private interests in promoting certain sites, along with the monopoly status of a relatively small number of Internet search engines, leads to a biased set of search algorithms that privilege whiteness and discriminate against people of color, specifically women of color. Through an analysis of textual and media searches as well as extensive research on paid online advertising, Noble exposes a culture of racism and sexism in the way discoverability is created online. As search engines and their related companies grow in importance—operating as a source for email, a major vehicle for primary and secondary school learning, and beyond—understanding and reversing these disquieting trends and discriminatory practices is of utmost importance. An original, surprising and, at times, disturbing account of bias on the internet, Algorithms of Oppression contributes to our understanding of how racism is created, maintained, and disseminated in the 21st century.
