Concurrent Programming In ML

The core idea of Concurrent ML, "synchronizable abstractions", is presented piece by piece, motivated by concrete examples that take up most of the book. Several later chapters present extended case studies of fairly complex systems built in CML, which provides a strong sense that these ideas are worth further exploration today.

Concurrent Programming in ML focuses on the practical use of concurrency to implement naturally concurrent applications. In addition to a tutorial introduction to programming in Concurrent ML (CML), the book presents three extended examples using CML for practical systems programming: a parallel software build system, a simple concurrent window manager, and an implementation of distributed ...

Concurrent Programming in ML by John H. Reppy

(October 2017) Concurrent ML (CML) is a concurrent extension of the Standard ML programming language characterized by its ability to allow programmers to create composable communication abstractions that are first class rather than built into the language.

Concurrent ML - Wikipedia

Concurrent Programming in ML presents the language Concurrent ML (CML), which supports the union of two important programming models: concurrent programming and functional programming. CML is an extension of the functional language Standard ML (SML) and is included as part of the Standard ML of New Jersey (SML/NJ) distribution.

CONCURRENT PROGRAMMING IN ML

Abstract: I have added concurrency to the functional language Standard ML. The model of concurrency is derived from CSP, but processes do not communicate directly; they interact by communicating over channels. Also, processes and channels can be created dynamically. Three features of Standard ML - polymorphism, garbage collection, and modules - work exceptionally well with concurrency.
