Most modern search engines offer features like storage and data manipulation logic. At the same time, most databases offer some sort of text-based search, but a database's ability to provide relevancy is either non-existent or a bolted-on afterthought.

Full Text Search Engines vs. DBMS | Lucidworks

In text retrieval, full-text search refers to techniques for searching a single computer-stored document or a collection in a full-text database. Full-text search is distinguished from searches based on metadata or on parts of the original texts represented in databases. In a full-text search, a search engine examines all of the words in every stored document as it tries to match search criteria. Full-text-searching techniques became common in online bibliographic databases in the 1990s. Many we

Full-text search - Wikipedia

A full-text index stores information about significant words and their location within one or more columns of a database table. A full-text index is a special type of token-based functional index that is built and maintained by the Full-Text Engine for SQL Server. The process of building a full-text index differs from building other types of indexes.

Full-Text Search - SQL Server | Microsoft Docs

MLA International Bibliography with Full Text. From the Modern Language Association (MLA) and EBSCO, this resource combines an extensive collection of full-text journals with the definitive index for the study and teaching of language, literature, linguistics, rhetoric, writing studies, folklore, film, theater, and other dramatic arts. Free Trial.

MLA International Bibliography with Full Text | EBSCO

A Variety of Sources Supporting Multiple Areas of Study. In addition to full-text articles, Art Full Text provides high-quality indexing and abstracts for peer-reviewed journals, art dissertations and art reproductions. This database also contains resources such as books by and about artists, artist materials and methods, artist profiles and a database-specific thesaurus.

Art Full Text | EBSCO

If the full-text system is used to index and search relational data, the document key is typically the primary key in the relational table or view. Data Types and Document Formats. Most full-text engines support character, numeric and data/time formats in addition to text. These fields can be used in searching, sorting and displaying results.

Relational Databases vs. Full-Text Search Engines - New ...

An online database consisting of at least one copy of every Old English text. It includes over 3,000 different texts representing about three million words of Old English and another two million words of Latin. Early English Books Online
