### System Analysis And Design Solution

System design is the phase that bridges the gap between problem domain and the existing system in a manageable way. This phase focuses on the solution domain, i.e. "how to implement?". It is the phase where the SRS document is converted into a format that can be implemented and decides how the system will operate.

System analysis & design is used to analyze, design & implement improvements in the support of users & the functioning of businesses that can be accomplished through the use of computerized information systems. Installing a system without proper planning leads to great user dissatisfaction & frequently causes the system to fall into disuse. System analysis & design lends structure to the analysis & design of information systems. The Need for System Analysis & Design.
