Because there are a fixed number of gears, and the transmission cannot always keep the engine at its best speed for maximum power or maximum fuel economy, the dual-clutch transmissions generally cannot extract as much power or fuel economy from an engine as a continuously-variable automatic transmission (CVTs). But because twin-clutch transmissions provide

a more familiar driving experience than CVTs, most drivers prefer them.

Transmission can be either manual, where the driver himself has to change gears, or automatic, when the vehicle itself does this task. The changing of gears, either manually or automatically, creates disruptions in the power transmission of the vehicle. This means that the engine power reduces momentarily when gears are being changed. ...
