Classifying Sharks using a Dichotomous Key

Shark Dichotomous Key Lab sharks. A dichotomous key is built around pairs of statements that describe a visible trait. The reader must select the statement in each pair that best describes an organism. By following the steps in the key, the reader narrows down the list of choices and finally names the organism. After you have learned to use a dichotomous key, you will design your own key for a group of organisms.

Key

Dichotomous Key Definition. A dichotomous key is a tool created by scientists to help scientists and laypeople identify objects and organisms. Typically, a dichotomous key for identifying a particular type of object consists of a specific series of questions. When one question is answered, the key directs the user as to what question to ask next. Dichotomous keys typically stress identifying species by their scientific name, as each individual species has a unique scientific name.
