The valve lifters are getting stuck. Noise goes away once then engine is warm because the oil becomes thinner and passes through the lifters more easily. It's coincidence it happened after you did...

Why did my engine start ticking after

doing an oil change

...

In some cases, the noise may have started shortly after an oil change or previous internal engine repairs. During diagnosis, the technician will find that the noise is coming from the cylinder head area and believes that several/all of the valve lash adjusters (lifters) are making noise.

A good example of this is when there is a ticking noise coming from the engine. A ticking sound could be caused by any number of reasons, such as a low level of oil or loose components. You may hear a ticking, clicking, or tapping noise while the vehicle is idling, accelerating, or even after receiving an oil change.

ticking noise and slight engine vibration after oil change ...

Before the oil change, it was ticking a little, which I've had before and usually goes away after changing the oil. When I started driving it was fine and then after about 5 miles it started a louder knocking sound. Haven't had this sound before. Definite knocking when the RPM get above 1500-2k. Jeep has 133k miles.

Knocking after oil change | Jeep Wrangler Forum

Typically, you'll need to dig deep into the engine to either fix the noise by replacing internal engine parts

(camshaft or crankshaft) or replacing the complete engine. Once an engine runs low on oil to the point where the engine makes noise, it's usually too late; the damage is done. Here is one tip of advice.

Knocking or Ticking Noise From Your Engine - AxleAddict ...

A knocking noise will sound like a rock tumbler in the deep depths of the engine and it will typically shake the vehicle at idle, and get louder as engine speeds increase.

Unfortunately, if you hear a knocking noise, it's usually a sign of major engine damage as a result of serious neglect - a simple oil change probably won't fix the problem.
