Issues In Child Health And

In addition to a child's physical well-being, there are also concerns about a child's behavior and emotional health. Major challenges include autism spectrum disorders, including Asperger syndrome, learning disorders, ADHD (attention deficit hyperactive disorder), and anxiety and depression disorders.

Children's Health: Growth, Common Injuries & Illnesses

Hearing impairment or vision impairment. Types of childhood disabilities and/or other special needs (for example, cerebral palsy, traumatic brain injury [see Overview of Head Injuries], Down syndrome [trisomy 21], and spina bifida) Coping with illness may require coping with pain, undergoing tests, taking drugs, and changing diet and lifestyle. A chronic health problem often interferes with a child's education because of frequent absences from school.

Chronic Health Problems in Children - Children's Health ...

The traumatic impact of abuse and neglect increases the likelihood of children developing a range of mental health issues – both during childhood and in later life. These include anxiety, depression, eating disorders and post-traumatic stress disorder (PTSD) (Norman et al, 2012; Spatz Widom, 1999).

Child mental health: recognising and responding to issues ...

Children's development and mental health are affected by various factors, including the environments they are raised in, the relationships they build and the experiences they have. Child development refers to the physical, cognitive, emotional and social growth that occurs throughout a child and young person's life.

Child health and development | NSPCC Learning

Many children, unfortunately, have long-term conditions – diabetes, epilepsy and asthma – and complex health issues, like neurodisability, which continue into adulthood. We know that half of all lifetime mental health illness can be diagnosed at the age of 14 so early intervention will alter the life chances of these young people.

NHS England » A new dawn for children’s health and wellbeing

Birthweights in the most deprived areas are on average 200g lower than in the richest, and children in disadvantaged families are more likely to die suddenly in infancy, to suffer acute infections, and to experience mental ill-health. Last year CPAG and the RCPCH surveyed paediatricians about the impacts of poverty.

The impact of poverty on child health | RCPCH

IMCI is an integrated approach to child health that focuses on the well-being of the whole child. Global Action Plan for Pneumonia and Diarrhoea (GAPPD) The integrated Global Action Plan proposes a cohesive approach to ending preventable pneumonia and diarrhoea deaths which together account for 29% of all child deaths globally.

WHO | Child health and development

Children living around debt are five times more likely to be unhappy than children from wealthier families. In some cases, children with a mental health issue won't have the bus fare to get to a service that may help, so they have to battle it alone.
