Business Telephone Systems | Moore Enterprises

A system administrator, or sysadmin, is a person who is responsible for the upkeep, configuration, and reliable operation of computer systems; especially multi-user computers, such as servers. The system administrator seeks to ensure that the uptime, performance, resources, and security of the computers they manage meet the needs of the users, without exceeding a set budget when doing so. To meet these needs, a system administrator may acquire, install, or upgrade computer components and software.

System administrator - Wikipedia

In information technology (IT), a system administrator (sysadmin) is a person who supports a multi-user computing environment and ensures continuous,

optimal performance of IT services and support systems. System administrator job responsibilities vary greatly among employers. In a large enterprise, the title system administrator may be used to describe any administrator who is responsible for a specialized IT system such the one
