Yes! There are systems in your body! The human body is made up of several organ systems that all work together as a unit! There are 10 major organ systems in the body, each of which plays a different role in helping the body work. Click on the button below to read a brief overview of each of these body systems.

Lesson 1 - Introduction to Body Systems - Ms. Richmond ...

Systems are made up of individual parts that work together and are usually connected to one or more other systems. If one part of the system is damaged, the system will not function well or may not function at all. These characteristics are true of systems in the human body. The human body is a complex system of
