Is There Life After School?

Problems, Perceptions and Potentials of Gifted Adults

While studies of the gifted are numerous, until recently, they have tended to focus on identification and special educational issues. Social and emotional issues have been explored as adjuncts to education. Except for a few longitudinal follow-ups of classical studies (Terman's and Hollingworth's), once the gifted individual has left school, he/she has been of little interest to researchers. Studies of adult giftedness have focused primarily on historically eminent individuals. There have been two traditional views of the gifted in terms of emotional and social stability. The gifted are either viewed as too well adjusted to require assistance, or they are regarded as inherently neurotic, or even insane. The former view seems to apply in research and education, while the latter is prevalent in society at large. Both positions tend to treat the gifted individual as if he/she were an essentially closed system, as if the effects of social interactions and responses have been excluded from consideration as factors in their lives. This paper describes six personality types, and five personality traits ascribed to gifted individuals in terms of the issues they present for gifted adults. Developmental aspects are also delineated. The gifted adult has grown up expressing traits that characterize giftedness, experiencing feedback from others, and has made choices for expression of excellence or satisfaction of intimacy needs based on this feedback. This forced choice

creates internal stressors, while the overt expression of the traits of giftedness creates external stressors. These stressors lead to counseling needs unique to the gifted.

Giftedness 101 *Springer Publishing Company*

In my estimation Giftedness 101 ranks high among authoritative texts devoted to this particular population of children. It not only offers thorough experience and knowledge-based insights to those who are already or are contemplating serving the social emotional needs of these children in the future, but also those who profess to educate future teachers, those who would venture out into classrooms charged with the teaching and many others besides. Pedagogy for Creative Problem Solving *Routledge*

This book provides students and practising teachers with a solid, research-based framework for understanding creative problem solving and its related pedagogy. Practical and accessible, it equips readers with the knowledge and skills to approach their own solutions to the creative problem of teaching for creative problem solving. First providing a firm grounding in the history of problem solving, the nature of a problem, and the history of creativity and its conceptualisation, the book then critically examines current educational practices, such as creativity and problem solving models and common classroom teaching strategies. This is followed by a detailed analysis of key pedagogical ideas important for creative problem solving: creativity and cognition, creative problem solving environments, and self regulated learning. Finally, the ideas debated and developed are drawn together to form a solid foundation for

teaching for creative problem solving, and presented in a model called Middle C. Middle C is an evidence-based model of pedagogy for creative problem solving. It comprises 14 elements, each of which is necessary for quality teaching that will provide students with the knowledge, skills, structures and support to express their creative potential. As well as emphasis on the importance of self regulated learning, a new interpretation of Pólya's heuristic is presented.

Innovation and Competition in Zimbabwean Pentecostalism

Megachurches and the Marketization of Religion *Bloomsbury Publishing*

Using the concept of a “religious market”, this volume explores how African Traditional Religions and churches within Prophetic Pentecostalism in Zimbabwe seek to attract and retain members and clients. Chapters provide extensive coverage of two of the leading churches, namely, Emmanuel Makandiwa's United Family International Church (UFIC) and Walter Magaya's Prophetic Healing and Deliverance Ministries (PHD). Contributors also explore the strategies adopted by Pentecostalism in general, while others focus on African Traditional Religions. They show that although Prophetic Pentecostalism has gained a significant share of the market in Zimbabwe and in Southern Africa in general, it is not without controversy. In particular, it has been associated with the abuse of women and exploiting members and clients for financial gain. Innovation and Competition in Zimbabwean Pentecostalism is an important contribution to

understanding the marketization of religion.

Creativity and Problem Solving at Work *Gower Publishing, Ltd.*

Creativity is not a rare talent. On the contrary, argues Tudor Rickards in this book, most people have the capacity to be creative but their potential is often untapped. Creativity at the workplace can be seen as a process of escaping from constraints, some of them self-imposed and some produced by an organizational climate unsympathetic to new thinking.
