In the first semester someone highly recommend me to read this book: Multivariable Mathematics: Linear Algebra, Multivariable Calculus, and Manifolds by Theodore Shifrin. Until now I have already finished the previous chapters studying by myself. I need to check my answers to this book's exercises and to improve the quality of my proof. If this book is accompanied by a solutions manual, so ...

My multivariable class used Shifrin's Multivariable Mathematics; I loved it! it's entirely shaped my mathematics education experience, but I found the proofs to be somewhat cryptic on occasion and less analytical in the approach from what I remember. But still I'd like to elaborate on that experience. Ideally they should cover, with proof and hopefully clear exposition, the following ...
