Functional benchmarking is the practice of comparing results across diverse industries and processes using commonalities in functional capabilities. This is often done to compare results to an industry that achieves superior results in a particular area. Functional benchmarking is also common when data is lacking for direct benchmarking. The following are illustrative examples.

9 Examples of Functional Benchmarking - Simpllicable

The benchmarking process generates a report through a detailed analysis, which helps in breaking down the mechanism that makes any superior performance

possible. This can further help in tweaking the product's features to match more closely to competitor's product and altering customer relationship management to establish more personalized communications with them.
