Metacognition in Science Education | SpringerLink

Metacognitive conflict is a process where students are encouraged to consider their perceptions surrounding what it means to be a good science learner, before having these ideas discussed (and potentially challenged) by their teacher, causing them to reflect

on their processes and methods of learning.

Developing metacognition in science class

It appears that metacognitive skills for orientation, planning, monitoring, and evaluation are equally important for these learning processes in science education. Finally, implications for the instruction of metacognitive skills are discussed. The chapter emphasizes the recurrent problems with the “fuzziness” of the concept “metacognition” and of its constituents.

5 Strategies For

Teaching Students To Use

Metacognition

Interest in exploring the role of metacognition in IPS stemmed from studies and developments in the field of library science. More important was education researchers' use of the Big Six Skills model to understand how students solve information problems; this focused attention on the role of metacognition in IPS.
