How Does The Engine Lubrication System Work? Know Here ...

The engine is the heart of your car. It is a complex machine built to convert heat from burning gas into the force that turns the road wheels.

Engine Management Systems

Engine Lubrication System: When two metallic surfaces under direct contact move over each other, they create friction which generates heat. This causes excessive wear

The engine | How a Car Works

- The system must make the assumption that all of the measured air mass does in fact go through the engine and also that the engine can get air from nowhere else

other than through the MAF sensor, this assumption does make these systems extremely vulnerable to leaks.
