After strategies are set and plans are made, management's primary task is to take steps to ensure that these plans are carried out, or, if conditions warrant, that the plans are modified. This is the critical control function of management. And since management involves directing the activities of others, a major part of the control function is making sure other people do what should be done.

The purpose of this paper is to review analytical conceptualizations of management control systems (MCS) that have been developed in the academic literature. By means of a systematic review (Tranfield et al. in Br. J. Manag. 14: 207-222, 2003), a comprehensive analysis that encompasses both textbook approaches and research papers is provided.
