C++ Game Coding Level 1 - Game Code School

In computing, a visual programming language is any programming language that lets users create programs by manipulating program elements graphically rather than by

specifying them textually. A VPL allows programming with visual expressions, spatial arrangements of text and graphic symbols, used either as elements of syntax or secondary notation. For example, many VPLs are based on the idea of "boxes and arrows", where boxes or other screen objects are treated as entities, connected by arrows, li
