Navistar / International | DT466 | Performance Diesel Parts

The DT466E Diesel Engine Memories The DT466E International diesel is no more mainly because it could not meet emission standards. It's one engine that performed only as good as the oil pressure that supplied the HEUI (hydraulic electronic unit injectors). They had a tendency to run rough when cold because of the lack of supply to the HEUI system which ran on thousands of pounds of oil pressure.

DT466 IPR VALVE INSPECTION AND REMOVAL - YouTube

The injector control pressure sensor is an engine management component that is

commonly found on diesel engines. As its name implies, it is an electronic sensor that monitors the fuel pressure going to the injectors. Diesel engines require an especially fine tuned fuel mixture, as they rely on pressure and temperature to ignite the fuel mixture ...
