The Shock Of Old Technology

Shock of the Old forces us to reassess the significance of old inventions such as corrugated iron and sewing machines and rethink the relative importance we place on the invention of something new, its application, and its widespread adoption. It challenges the idea that we live in an era of ever increasing change and, interweaving political, economic and cultural history, teaches us to think critically about technology.

The Shock Of The Old: Technology and Global History since ...

Now, in The Shock of the Old, David Edgerton offers a startling new and fresh way of thinking about the history of technology, radically revising our ideas about the interaction of technology and society in the past and in the present. He challenges us to view the history of technology in terms of what everyday people have actually used--and continue to use--rather than just sophisticated inventions.

The Shock of the Old: Technology and Global History Since ...

'The Shock of the Old' challenges us to view the history of technology in terms of what everyday people have actually used - and continue to use around the world - rather than just what was invented. The reader discovers that many highly touted technologies - from the V2 rocket to the Concorde jet - have been costly failures.

The Shock of the Old challenges us to view the history of technology in terms of what everyday people have actually used--and continue to use around the world--rather than just what was invented....

The Shock of the Old: Technology and Global History Since ...

The Shock of the Old : Technology and Global History Since 1900 (2007) by David Edgerton is a fascinating book about how technology is actually used. The book carefully looks at how many technologies, like horses peaked well after their replacements were also in service. Edgerton is a professor of the History of Science at Imperial College.

The Shock of the Old: Technology and Global History Since ...

"The Shock of the Old" is one of the best of these, and it is full of examples of how inventions developed in unexpected places. For example, he points out that in 1895, there were more automobiles running on the streets of Barcelona than

there were in New York (or Detroit). But is it all accurate?
