When a woman was found dead in her bathroom, the evidence pointed to suicide. But a coroner's inquest and a unique application of forensic science gave investigators a different explanation

for her death. It was a theory that, if true, could turn the grieving husband into the prime suspect. Originally aired as Season 10, Episode 38.

Forensic Files - Season 10 - IMDb

The main problem with the series (at least in the first few series), is the main suspect is mentioned within just a few minutes of the episode started. After this, the whole setup becomes uninteresting as there's no 'whodunnit' element. It's OK to watch in the background but not something to cuddle up to.
