In Memory Data Management

Technology

As enterprises increasingly turn to real-time big data, in-memory data management enables organizations to use big data for competitive advantage without increasing latency. Rather than burying data deep in a database where latency can become a problem as data volumes and user numbers increase, in-memory data management technology enables big data to be stored in-memory where it can be quickly retrieved by multiple users with multiple applications.

In-Memory Data Management Technology and Applications

An in-memory database is a database management system that primarily relies on main memory for computer data storage. It is contrasted with

database management systems that employ a disk storage mechanism. In-memory databases are faster than disk-optimized databases because disk access is slower than memory access, the internal optimization algorithms are simpler and execute fewer CPU instructions. Accessing data in memory eliminates seek time when querying the data, which provides faster and mo

In-memory database - Wikipedia

This book presents, for the first time, how in-memory data management is changing the way businesses are run. Today, enterprise data is split into separate databases for performance reasons. Multi-core CPUs, large main memories, cloud computing and powerful mobile devices are serving as

the foundation for the transition of enterprises away from this restrictive model.

In-memory data management technology and applications ...

In computer science, in-memory processing is an emerging technology for processing of data stored in an in-memory database. Older systems have been based on disk storage and relational databases using SQL query language, but these are increasingly regarded as inadequate to meet business intelligence needs. Because stored data is accessed much more quickly when it is placed in random-access memory or flash memory, in-memory processing allows data to be analysed in real time, enabling faster repor

In-memory processing - Wikipedia

In-Memory Data Management: Technology and Applications . 2012. Abstract. In the last fifty years the world has been completely transformed through the use of IT.
