Evolution And Selection Answer Key

Read This! The events that lead to changes in groups of organisms are called selection by evolutionary biologists. Charles Darwin (1809-1882) is the person credited with carefully outlining how various changes in populations of organisms might occur through time. He called this process natural selection.

Evolution and Selection - Mrs. Slovacek's Science

1) evolution depends on the genetic variability generated by mutations, which continuously arise within populations. 2) it also relies on changes in the frequency of alleles within populations over time.

The fate of those mutations that affect the fitness of their carrier is partly determined by natural selection.
