The following is a list of integrals (antiderivative functions) of rational functions. Any rational function can be integrated by partial fraction decomposition of the function into a sum of functions of the form: $(-)$, and $(-)$ $(+)$. which can then be integrated term by term. A lot of the integrals in this section can easily be done using a Table of Integrals.

(Of course, use a computer to do integrals whenever you can!) Points to note: It's very important to understand the substitutions u and du (which is the case for most integrations) Make sure you use the correct formula!! Some are very similar to others.
