An Introduction To Linear Programming

Linear Programming is a generalization of Linear Algebra. It is capable of handling a variety of problems, ranging from finding schedules for airlines or movies in a theater to distributing oil from refineries to markets. The reason for this great versatility is the ease at which constraints can be incorporated into the model.

Linear Programming is an optimization problem where the objective function and the constraints are linear functions of the optimization variables. In addition, several nonlinear optimization problems can be solved by iteratively solving linearized versions of the original problem.

IET Digital Library: An introduction to linear programming

In linear programming (LP), all of the mathematical expressions for the objective function and the constraints are linear. The programming in linear programming is an archaic use of the word "programming" to mean "planning". So you might think of linear programming as "planning with linear models".
