Tumour virology - history, status and future challenges

Abstract. In its original sense the word tumour described any abnormal swelling in an individual, but its use is now restricted to pathological conditions caused by the excessive and apparently purposeless growth of cells — often with harmful effects.

Tumour virology | SpringerLink

Virology is the study of viruses – submicroscopic, parasitic particles of genetic material contained in a protein coat – and virus-like agents. It focuses on the following aspects of viruses: their structure, classification and evolution, their ways to infect and exploit host cells for reproduction, their interaction with host

organism physiology and immunity, the diseases they cause, the ...
