Engine Governor Fault And Fuel Injector Fault

The diesel engine, named after Rudolf Diesel, is an internal combustion engine in which ignition of the fuel is caused by the elevated temperature of the air in the cylinder due to the mechanical compression (adiabatic compression); thus, the diesel engine is a so-called compression-ignition engine (CI engine).This contrasts with engines using spark plug-ignition of the air-fuel mixture, such ...

Diesel engine - Wikipedia

Diesel engine generator governors are sometimes referred to as the speed controller for the diesel engine. The diesel engine must maintain a pre-determined speed to maintain generator output specifications. If the engine speed is not correct the generator will not maintain the required output specifications. This article will explore the different types of governors equipped on diesel generator sets. Governors can be divided into two basic groups:

Diesel Engine Generator Governors

The main function of the Governor in the IC Engines is to regulate the mean speed of the engine when there is a variation in the load. But there the flywheel is used to control the fluctuations of the speed during each cycle. It should not be confused with the governor function with the flywheel function.
