For most of political science's history, discussions about professional ethics had nothing to do with human subjects. Professional ethics involved integrity in the classroom, fair tenure and promotion rule, and the careful avoidance of plagiarism. As most research was observational, there was little need for attention to how scholarly activities might directly affect the subjects of our work.

Ethical issues in human research generally arise in relation to population groups that are vulnerable to abuse. For example, much of the ethically dubious research conducted in poor countries would not occur were the level of medical care not so limited. Similarly, the cruelty of the Tuskegee experiments clearly reflected racial prejudice.

Human Experimentation: An Introduction to the Ethical Issues

A major problem for field experiments is that there is no way that the researcher can hope to control all the possible independent variables. The problem works both ways. If we control the situation we make it artificial, if we want the situation to be realistic, we have to accept that we cannot control all the variables.
